Please specify your role in healthcare (advance practice provider, neurologist, general practitioner, researcher, patient or care partner)

Please disclose any possible conflict of interest with respect to the topic being studied. A conflict of interest does not preclude review of documents

Regarding our research protocol including the data extraction forms to develop and establish new PML diagnostic criteria, we would like to ask you to comment on the following questions

### 1a. Research approach

Please mark the statement you agree with most

The research approach is appropriate

The research approach is somewhat appropriate\*

The research approach is neither appropriate nor inappropriate\*

The research approach is somewhat inappropriate\*

No response

\* Please specify why the research approach is not fully appropriate

### 1b. Comments on the research approach

Please provide any specific comments on our protocol

### 2a. Is the protocol clear?

The draft protocol is clear

Elements of the protocol are unclear\*

No response

\* Please specify why the protocol is unclear

**3. Is the search strategy for the systematic review appropriate?**

Yes

No, there are key elements missing\*

Unsure \*

\* Please specify why you think the systematic review process is unclear or why you are unsure

**4. Do you agree with inclusion/exclusion criteria for the systematic review?**

Yes

No, the inclusion/exclusion criteria need revisions\*

No comments

\* Please specify why the inclusion/exclusion criteria need revisions

**5. Do you feel the data extraction forms to be used for compiling data are appropriate?**

Yes

No\*

No response

\* Please specify why the data extraction forms are not appropriate

**6. What tools could accompany this guideline to make it more useful when published?**

**7. Are there any experiences that you want to share that would further inform this guideline?**

**8. Please provide any additional comments**

**My comment/concern I entered in "Please provide additional comments above" relates to (check all that apply)**

**Author panel**

**Clinical questions**

**Methodology**

**Impact of guideline**

**Personal experience**

**Spelling**

**Grammar**

**Terminology, word choice**

**Other\***

**\* Please specify "Other"**
