

Invitation to Final Exams in the International MD / PhD Program “Molecular Medicine” November 14th, 2025

Public defences

Friday, November 14th, 2025

*** (Lecture Hall M; building J1)**

Chairs: Dörk-Bousset, Behrens

11.45 Friederike Kühl (Clinical Chemistry and Central Laboratory):

“Functional characterization of MARCKS-associated immunological processes in the monocytic cell type”

13.30 Büsra Cinar (Pediatric Hematology and Oncology):

“Linking mechanisms of adaptive proteostatic remodelling to novel therapeutic strategies and biomarker development in acute lymphoblastic leukemia”

15.00 Josephine Wilkes (Experimental Hematology):

“Tailoring AAV vectors for gene therapy of inner ear disorders by directed evolution”

*** (Lecture Hall N; building J1)**

Chairs: Labus, Shcherbata, Dörk-Bousset

10.45 Kristina Losse (Neurology):

“Investigation of the role of NIPSNAP3A and NIPSNAP3B in human dopaminergic neurons and a Parkinson’s disease cell model”

12.15 Lea Oehlsen (IMTTS):

“Investigation of the long non-coding RNA Foxo6os in cardiovascular disease”

13.45 Tonia Bargmann (Fraunhofer Institute ITEM):

“Ex vivo stimulation of patient-derived tumor lung slices with anti-PD-1 and anti-CD39 induces respective CD8⁺ T cell and macrophage responses”
