Tasks

- Mating tasks (0)
- Biopsies (0)
- Free text tasks (3)
- Resolve conflicts (0)
- Wean pups (1)
- Register pups
- Husbandry (67)
- Mark animals
- Departure tasks (11)
- Find ill animals (0)
- Find abnormal animals
- Print animal card
- Add new animals

Dr. Nadine Held

[held.nadine@mh-hannover.de](mailto:held.nadine@mh-hannover.de)

Matthias Ottinger (PhD)

[ottinger.matthias@mh-hannover.de](mailto:ottinger.matthias@mh-hannover.de)

# structure of today's talk

## 1. Part: General LAVAN introduction

- Why MHH chose LAVAN? LAVAN advantages
- LAVAN user interfaces (desktop (projects), animal room (touch))
- How do I find my animal related data in LAVAN?
- How do I place mate requests, euthanasia tasks or transport requests?
- What is important when I am in the animal room myself?

## 2. Part: Focus on experimental documentation (animals 'in experiment')

- essential documentation requirements...
- ...to generate reporting for the authorities

## 3. Part: next steps

# www.omikronsystems.com

A close-up photograph of a lion's face, looking directly at the camera. The lion has a thick, golden-brown mane and intense yellow eyes. In the background, a laptop screen is visible, displaying some text and graphics, though it is out of focus.

Our vision becomes reality:  
the paper-free animal room.

## LAVAN

LAVAN by Omikron Systems is THE professional management software, that will help you improve all aspects of work done in your animal facility. LAVAN is the management tool that puts you in a position to use the resources of your research animal facility more efficiently. That's how you will have more resources to pursue the core business of your organization: Performing excellent research or providing services to your customers.

# LAVAN is in use in universities, research institutes and industry

## References

## LAVAN

- promotes the lean, efficient and error-free animal facility
- helps us to fulfil legal requirements and documentation requirements
- is (relatively) easy to use and has low training requirements
- MHH has more resources to do our core business: do excellent research
- Because of LAVAN we can already provide higher service levels:
  - setting up matings, performing euthanisations (scientist places tasks via LAVAN), weaning, and more
  - e.g. breeding documentation is completely done by LAVAN automatically (no more paper based documentation required)

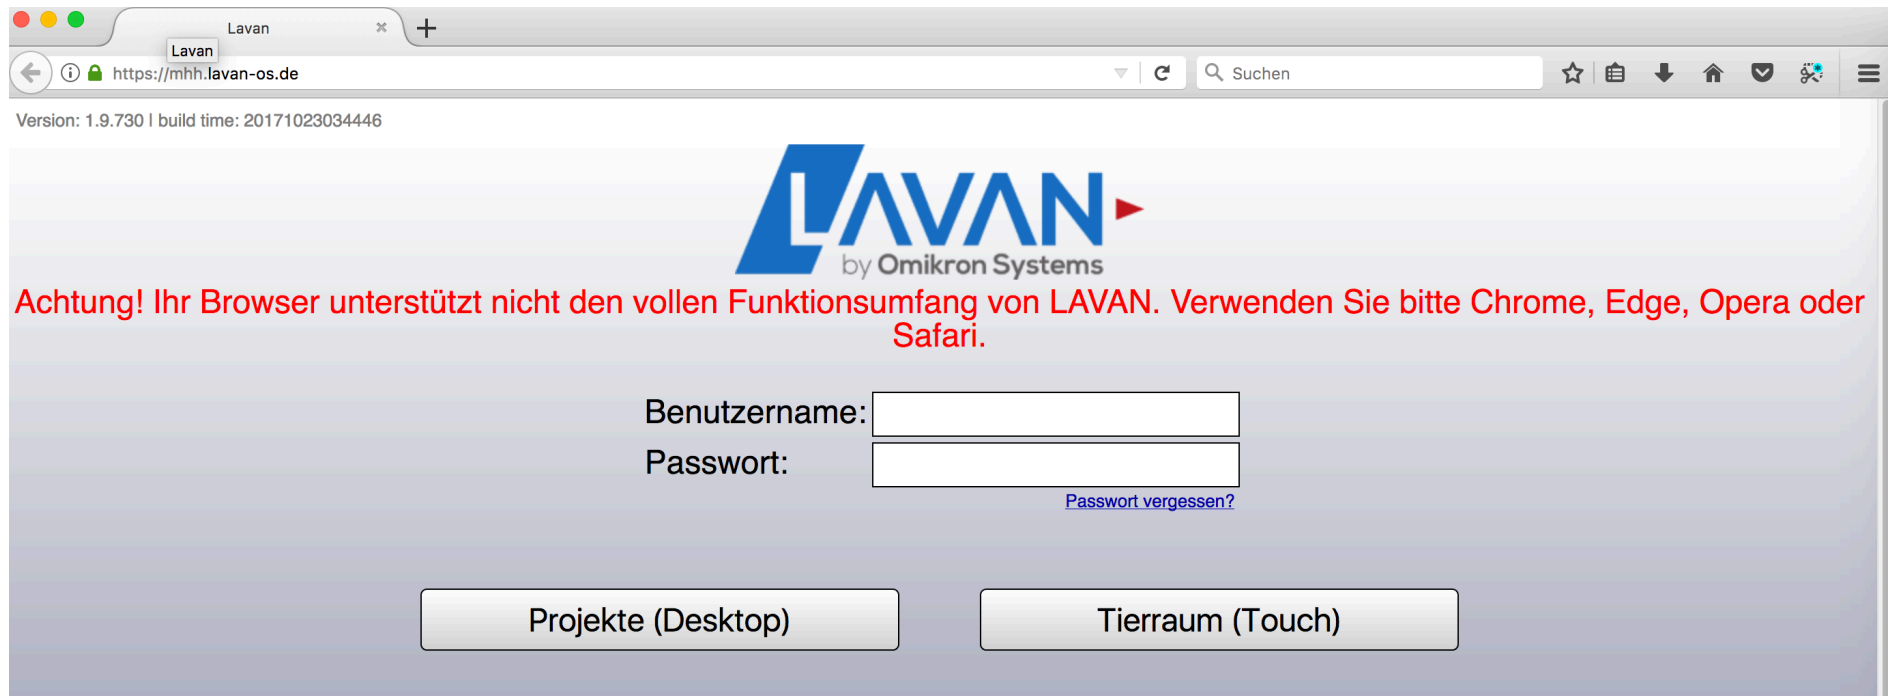

## modern web-application/ access / security: state-of-the-art software

# Browsers that support full LAVAN functionality

- Google Chrome
- Microsoft Edge (comes with Windows 10)
- Apple Safari
- Opera

# LAVAN integrates important aspects and processes of our data management to promote efficient work flows

## **billing**

- automated reports with animal and cage numbers
- per working group and room

## **communication/ tasks**

- real time
- documentation of all relevant events
- user with specific access rights

## **breeding management**

- easy, transparent
- species-specific logic
- promotes efficient breeding

## **animal location**

- unit, room, rack, cage
- cage occupancy
- animal transfers between cages are tracked

## **strains/genotyping**

- detailed strain info
- e.g. genetically modified, stressed, cryostock
- genes/alleles

## **experimental documentation**

- protocols
- tasks
- easy documentation
- GLP-ready

## **animal welfare/licenses (TVA)**

- license management
- animal numbers
- projects linked to licenses
- prospective/acutal severity

## **vet module**

- sick animals
- abnormal animals
- treatments...

# With LAVAN we always know where animals are and what tasks are due

strain identifier  
ZTL-Code

year of entry into LAVAN

unique number per strain and year

sex (F, M, U)

mark (if animal is marked)

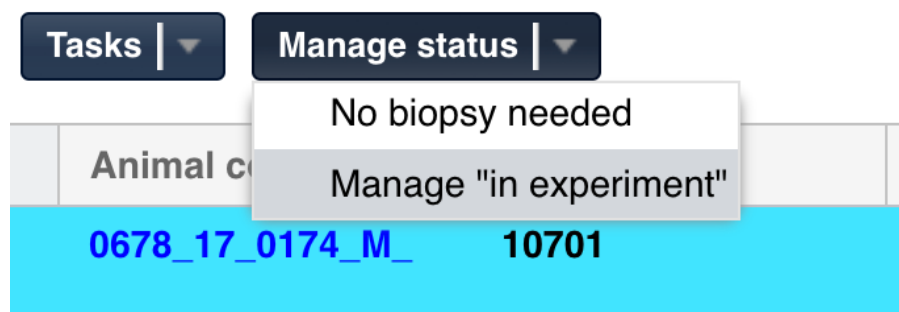

# LAVAN project definition

- ‚projects‘ in LAVAN: group of animals for a specific purpose
  - projects without license (husbandry, breeding-no license required)
  - projects with license (experiment, breeding-with license)

	<input type="checkbox"/> breeding-no license required
Scha	<input checked="" type="checkbox"/> breeding-with license
5340	<input checked="" type="checkbox"/> experiment
0)	<input checked="" type="checkbox"/> experiment with breeding
01)	<input type="checkbox"/> husbandry
01)	Bleich, André
01)	Bleich, André

## LAVAN animal status 'in experiment'

- in projects that require a licence experimental animals get the status ,in experiment' by the scientist
  - after that, these animals can only depart as §4 or §7 animals dependent on the linked license

78 (11)	 
78 (11)	 
78 (11)	 
78 (11)	 
78 (11)	 

- §4 and §7 animals can only depart from projects with linked license. Departed animals are then counted on that license for reporting.
- §7 animals (experimental animals) must get a severity assessment of actual severity at least once (usually by the scientist): mild/moderate/severe

# logic link from licence to project to animal

license (e.g. §7 only)

	Antrags-ID ↑	Titel	Abga...	Org. Einheit	Genehmigungsnr.	Abkürzung	Versuchsleiter
	1	Z: Zucht belasteter Stämme §8 Abs.1 ...	§7	AG Bleich (8601),ZTL (8600)	33.12-42502-04-14/1730	14/1730	André Bleich

07.07.2017 - 10:01:11	Sabine Dreyer	SV2 (Gering/Mild)

Zucht belasteter Stämme (§7)

§7 Abbruchkriterien erfüllt (§7)

§7 geplant euthanasiert (§7)

- project(s) is(are) linked to **one** license
- animals are always in exactly one project
- experimental animals get the status: 'in experiment' when the experiment starts
- documentation of animal controls by documenting severity assessment
- departure with departure reasons according to category §7

animal will be counted onto the linked license

based on these data LAVAN generates comprehensive reports for reporting to the authorities

## Report nach Versuchstiermeldeverordnung 2013

Verordnung über die Meldung zu Versuchszwecken verwendeter Wirbeltiere oder Kopffüßer oder zu bestimmten anderen Zwecken verwendeter

Anlage (zu § 1 Absatz 2) Meldung von in Tierversuchen verwendeten Wirbeltieren oder Kopffüßern oder nach § 4 Absatz 3 des

Wirbeltieren für das Jahr: 2017

## change of documentation from cards to LAVAN

- from cards (white ‚Tierschutzkarten‘) and manual counting to complete reporting via LAVAN
- in the year of transition numbers have to be aggregated by hand
- very important: exact date of transition for individual research group
  - until this date: old system (Tierschutzkarten)
  - from that date on: correct and complete registration of departures of §4 and §7 animals via LAVAN from experimental projects only

to be able to document in real-time in the animal room and to get access to your animal data you need access to LAVAN

- Laptops are possible
- recommendation for animal room:
  - **Apple iPad (current generation), cheapest version ok**
  - cost: approx. Euro 370,-
  - please contact Branko Jandric for offer ([jandric.branko@mh-hannover.de](mailto:jandric.branko@mh-hannover.de); Tel 3708)
  - **on the MHH order: ,iPad für LAVAN‘**
  - once the device arrived:
    - go to Branko Jandric
    - needs to be inventarized at MHH
    - WLAN access at ZTL

## Next steps

- for all scientific groups until introduction until end of 2017
- scientific groups that already have all animals in LAVAN: no change
- scientific groups that have no animals/ part (e.g. breeding) of their animals in LAVAN: roll-out for all animals incl. experimental animals
- for each scientific group/ or department: main contact person at ZTL in charge. This person either has contacted your group already or will do so very soon.
- always necessary (please prepare in advance):
  1. In which rooms are you animals?
  2. List per room: strains/lines with lab name and ZTL-strain code
  3. List of actively used licenses (TVAs) (with authorisation number, e.g. 17/1234)
  4. List with all persons in group that will work with animals (incl. email and phone number). We need this to set up user accounts.

# current contact persons at ZTL

- **Martina Dorsch:**
  - clarification or novel strain identifiers (ZTL-Codes)
  - verify strain information and set up strain in LAVAN (M. Dorsch, M. Ottinger, I. Brüsche)
- **Nadine Held/Andrea Krüger (Tierschutzbüro):**
  - verify licenses (TVAs) and administrate them in LAVAN
- **Branko Jandric:**
  - Hardware/WLAN/iPads
  - 1. contact person with problems that likely have technical reasons, e.g.. connectivity issues, WLAN, (Tel. 3708)
- **Nadine Held/Matthias Ottinger:**
  - general introductions
- **different persons:**
  - first contact person during the roll-out process for your scientific group
  - person from ZTL will contact your group
  - coordination in detail for your scientific group/department
- **Matthias Ottinger:**
  - coordination
  - contact me with general questions/issues (Tel. 17-3954)
